

# Hack The Box Netherlands

1st Wednesday Hack-day  
meetup

**Welcome!**

# Before we start

- When presentations are going, please **mute your microphone** (we all love the sound of mechanical keyboards, but it makes it hard to hear people)
- If you have a **question**, type it in the **chat**
- Portions of this meetup will be **recorded**

**\$ whoami**

**Arjen / credmp**

Cyber Security Faculty of NOVI  
University of Applied Science

# What to expect

- Today we are **Hacking Together**
- After this presentation you **form groups** (by choosing a machine)
- I will add you to the **breakout** room for that machine
- So, what machines **are available**?

# Creating groups

- In a **direct message** (Zoom chat) send me:
  - Your **HTB Username**
  - Which machines you would like to attack (**2 or 3 choices**)
    - Easy: Traceback, Traverxec, Netmon, Writeup
    - Medium: Chatterbox
- I will **form groups** based on your choices, distributed somewhat evenly
- Start **sending them now!**

# A Dedicated Server

Linux/Parrot Linux, or build your own toolkit from scratch. We do not recommend using Windows as your primary attack environment.

- Download your connection pack [here](#).
- Run `openvpn credmp4novi.ovpn` in terminal.
- Have fun! Find IP addresses of attackable machines on the [Active Machines](#) page.

**Tickets**

Below is a list of your active tickets. Each ticket allows access to a specific lab or lab group.
